SKILLS

- **Programming Languages:** C++, C, Java, JavaScript
- **Frameworks/Libraries:** React.js, HTML5, CSS3, Tailwind CSS, Express.js, Node.js
- **Tools/Platforms:** VS Code, Git, GitHub
- **CS Fundamentals:** DBMS, OOPs, Operating Systems, Computer Networks
- **Databases:** MySQL, MongoDB
- **Soft skills:** Problem-Solving, Team Player, Project Management, Adaptability

TRAINING

Data Structures & Algorithms (C++ Programming) — Grade O (90%+)

Jun 2025 - Jul 2025

- Strengthened problem-solving skills by implementing core Data Structures and Algorithms using C++.
- Applied concepts like recursion, backtracking, greedy algorithms, and binary search to optimize solutions.
- Implemented STL components such as vectors, maps, sets, priority queues, and unordered containers for optimized coding.

PROJECTS

Home Ease - Full-Stack Project

Jun 2025 - Jul 2025

Link - [Home-Service-Booking](#)

- Built an end-to-end home service booking platform where users can view services, check available workers, and place bookings through a React-based frontend.
- Implemented JWT based authentication for login and signup, securing protected routes and user-specific actions.
- Designed MongoDB schemas for users, services, workers, and bookings to ensure efficient data storage and retrieval.
- Created backend APIs using Node.js and Express to manage bookings, user data, and service listings.

Tech Stack: React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB (Mongoose)

Music Streaming Platform

Oct 2025 - Jan 2026

Link - [Music-Streaming-Platform](#)

- Developed a music streaming web application that allows users to search songs, play music, and manage personal playlist.
- Integrated the Jamendo API to fetch music data dynamically and display it on the frontend.
- Implemented JWT authentication to securely store user-specific data such as liked songs and playlist.
- Built backend APIs using Node.js and Express to handle user actions and persist data in the database.

Tech Stack: React.js, Node.js, Express.js, JavaScript, JWT, Jamendo API

Dynamic Coupon Code Management

Apr 2024 - Jun 2024

Link - [GITHUB](#)

- Developed a dynamic Coupon Code Management System for real-time creation, validation, and expiration of discount codes.
- Built and integrated RESTful APIs for coupon generation and validation using Node.js and Express.
- Implemented rule-based validation including expiry dates, usage limits, and user restrictions.
- Designed a responsive admin dashboard to manage coupons and monitor analytics.

Tech Stack: React.js, Tailwind CSS, JavaScript, Node.js, Express.js, MongoDB(Mongoose)

CERTIFICATES

- ChatGPT-4 Prompt engineering: ChatGPT, Gen AI & LLM - by Infosys
- Cloud Computing(NPTEL)
- Build Generative AI Apps and Solutions with No-Code Tools - by Infosys

May 2025 - Aug 2025

Feb 2025 - Jun 2025

Aug 2025 - Oct 2025

ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, Codeforces, and Coding Ninjas.
- Secured 2nd Rank in Web-a-thon Hackathon for developing an innovative and scalable web-based solution.

EDUCATION

• Lovely Professional University

Bachelor of Technology - Computer Science and Engineering **CGPA: 6.64/10**

Jalandhar, Punjab

Aug 2023 - Aug 2027

• PR COLLEGE

Intermediate **Percentage: 63%**

Sonpur, Bihar

Apr 2022 - Mar 2023

• St John's Academy

Matriculation: **Percentage: 67%**

Hajipur, Bihar

Apr 2020 - Mar 2021
